

What is claimed is:

- 1 1. A document-loading panel structure for scanner, wherein a document-loading
2 panel is made of a transparent acrylic material to become a transparent acrylic
3 document-loading panel.
- 1 2. The document-loading panel structure for scanner according to claim 1, wherein
2 a chart is printed on the transparent acrylic document-loading panel directly.
- 1 3. The document-loading panel structure for scanner according to claim 1, wherein
2 a chart is attached on the transparent acrylic document-loading panel.
- 1 4. The document-loading panel structure for scanner according to claim 1, wherein
2 a chart is printed on a document cover of scanner directly.
- 1 5. The document-loading panel structure for scanner according to claim 1, wherein
2 a chart is attached on a document cover of scanner.
- 1 6. A document-loading panel structure for scanner, wherein an up housing and a
2 document-loading panel of scanner are made of a transparent acrylic material by
3 integral molding.
- 1 7. The document-loading panel structure according to claim 6, wherein a chart is
2 printed on the document-loading panel directly.
- 1 8. The document-loading panel structure according to claim 6, wherein a chart is
2 attached on the document-loading panel.
- 1 9. The document-loading panel structure according to claim 6, wherein a chart is
2 printed on a document cover of scanner directly.
- 1 10. The document-loading panel structure according to claim 6, wherein a chart is
2 attached on a document cover of scanner.
- 3 11. A document-loading panel structure for scanner, wherein an up housing and a
4 document-loading panel of scanner are made of a transparent material.

1 12. The document-loading panel structure according to claim 11, wherein a chart is
2 printed on the document-loading panel directly.

1 13. The document-loading panel structure according to claim 11, wherein a chart is
2 attached on the document-loading panel.

1 14. The document-loading panel structure according to claim 11, wherein a chart is
2 printed on a document cover of scanner directly.

1 15. The document-loading panel structure according to claim 11, wherein a chart is
2 attached on a document cover of scanner.
